Wisenet Achieves ISO/IEC 27001:2022 Certification for Information Security Management Systems

Melbourne, Australia – 9 April 2024 – Wisenet, a division of Adapt IT Group, proudly announces its successful attainment of ISO/IEC 27001:2022 certification for Information Security Management Systems (ISMS). This achievement underscores Wisenet's unwavering commitment to upholding the highest international standards in establishing, implementing, maintaining, and continuously enhancing its ISMS.

The rigorous certification process, undertaken for the mutual benefit of our customers and core business operations, reflects Wisenet's dedication to securely managing assets such as employee data, intellectual property, financial records, and information concerning clients and third parties.

Alister Smith, Chief Operating Officer at Wisenet, expressed his pride in the accomplishment, stating, "Attaining ISO/IEC 27001 certification is the culmination of significant effort and engagement from every Wisenet team member. We are consistently pushing ourselves to enhance our service delivery, ensuring the highest security standards and privacy that not only meet but exceed the needs and expectations of our customers."

This certification serves as a testament to Wisenet's steadfast commitment to safeguarding sensitive client data. With the frequency and severity of data breaches on the rise, customers can trust in Wisenet's evolving ISMS cybersecurity measures, validated by an independent third-party assessment.

By adhering to the internationally recognised standards outlined in ISO/IEC 27001:2022, Wisenet is now certified for the scope of "Cloud development and operations." This certification verifies the implementation of ISMS across all facets of business operations, processes, services, and infrastructure, including Wisenet's specific cloud

development tools, methods for accessing customer systems, and risk mitigation strategies.

Furthermore, this achievement underscores Wisenet's culture of continual improvement within its research and development team. As the cybersecurity landscape evolves and demands intensify, Wisenet remains poised to uphold its certification through ongoing revalidation processes and by adapting to emerging challenges.

About ISO/IEC

ISO (International Organisation for Standardisation) provides a structured framework for management processes, information technology risk, development, and deployment practices, and how businesses access their systems and customers' systems.

ISO/IEC 27001:2022, published by ISO and IEC (International Electrotechnical Commission), is an internationally recognised set of standards governing an organisation's information security.
