

PRESS RELEASE

## Wisenet sets to close the hardware gap at MBF schools

**Johannesburg, South Africa, 18 August 2022** – Wisenet, a division of Adapt IT and a global leader in the development and supply of Cloud software management solutions for corporate and vocational training providers has set to close the hardware gap at Nursing Schools across the African continent.

In 2021 Wisenet partnered with the [Medical Benevolence Foundation \(MBF\)](#), an International Christ-centered medical mission organisation, to deploy the Moodle Learning Management System to Nursing Schools across Kenya and Malawi to provide online learning opportunities to front line medical professionals amidst the Covid-19 pandemic. Collectively the schools enrol 2500 students and offer studies in Nursing and Midwifery.

While the schools reported great success with the Online Learning platform, which allows faculty to create online and offline course content and customise their courses for students, it became apparent that some learners do not have access to hardware devices, limiting their ability to enjoy and progress with the online learning content.

Considering this Wisenet sets to spur the donation of Raspberry Pi computer devices to the MBF supported nursing colleges across the African continent.

“The MBF schools have reported great progress through the Moodle Online Learning platform but reports also confirm a significant shortage of hardware devices for all learners to benefit from the platform. Through our initiative of spurring the donation of Raspberry Pi computer devices to the schools, we hope to elevate the accessibility and enjoyment of online learning to MBF supported students in Africa,” says Ben Hamilton, CEO and Co-Founder of Wisenet.

To close the hardware gap, Wisenet is excited to give customers the option to donate Raspberry Pi computer devices to the schools across the African continent but to bolster this, Wisenet will take the initiative to match the said offer. For example, if an independent company or Wisenet customer

chooses to donate two Raspberry Pi computers to the MBF schools, Wisenet will match this donation, equating to a total of four donated computers.

Learn more about how you can contribute to the MBF schools [here](#).
