

JOB TITLE – Front End Software Engineer (Angular C#)

Position reports to : Product Owner
Office Location : Adapt IT Johannesburg Campus

PURPOSE OF THE POSITION

The Software Development Team of Adapt IT Education delivers solutions for higher education on a global basis. We value diverse skills and look for a wider range of experience but centred on the full stack **C#** .Net Core with **Angular** front ends. As a Front-End Developer, you will be required to collaborate with a team of developers and UX designers to develop and maintain a web application. Important responsibilities include applying features to the user interface and implementing mock-up wireframes by UX designers as components. The ideal candidate possesses strong communication skills and ability to develop reusable, efficient, and scalable code. In the role you will provide input into our scalable web-based solutions.

PRIMARY RESPONSIBILITIES FOR THE ROLE

- a) **Design, Implement and Maintain world-class web applications and workflows**
 - Develop new user-facing features using **Angular**.
 - Create new features or parts of applications.
 - Translating designs and wireframes into high quality code.
 - Build reusable components and front-end libraries for future use.
 - Translating designs and wireframes into high quality code.
 - Optimizing components for maximum performance across a vast array of web-capable devices and browsers.
- b) **Design Fit for Purpose Solutions & Algorithms**
 - Ensuring cross-platform optimization for mobile phones.
 - Actively contribute to design and planning meetings, discussions, and documentation.
- c) **Developer Testing and Verification**
 - Ensure the solution is test friendly by creating effective mechanisms for test data, automated testing hooks and simulations.
 - Ensure reported defects are categorised by priority and fixed as appropriate.
 - Ensure the project management team is informed of potential risks stemming from defects.
- d) **Mentorship / Training**
 - Provide mentorship and guidance to internal staff on technical and system processes.
 - Perform internal training for technical staff as required.
 - Ability to mentor and assist others, and to lead internal training sessions
 - Mentor junior resources on specialised knowledge

QUALIFICATION AND EXPERIENCE REQUIREMENTS

- 5+ years of professional experience in React.js
- BSc (Computer Science or Information Systems) /B Com (Information Systems)/Diploma in Information Systems

SKILLS

- C# .NET Framework 4.7.2+
